

BROMELIADS

TALNADGE FERN GARDENS

354 "G" Street

Chula Vista, Calif. 92010

Phone (714) 422-4159

TERMS OF SALE

Minimum order \$10.00, cash, check or money order. No C.O.D. California residents add 5% sales tax.

Our weather permits us to ship year round, although the customer should consider his own weather when ordering plants. Plants ordered during the months of December, January and February will be shipped at customers risk.

Since shipment costs vary for every locality, we have no way of knowing how much the shipping charges will be. We will bill you for the shipping charges after we have shipped the plants. We can ship Air Mail or regular Parcel Post. For the quickest way of delivery, we recommend Air Mail. Our responsibility ends when package is accepted by carrier. If you wish your package insured please indicate so in your order.

Straight Parcel Post is slow and no special care is given the package by postal employees, we advise requesting "Special Handling" or "Special Delivery" which provides more caution in handling and faster delivery.

Due caution is given on proper handling and packing, etc. All plants are labeled and names are correct to the best of our knowledge. All plants are shipped bare root.

Substitutions will not be made without customers consent. We have a good stock of plants listed, however, some sell more rapidly and it is wise to give a second choice.

Visitors to our Fern Gardens are always welcome. Visitors coming from any distance should telephone us first to be sure we will be home that day, our phone number is: Area Code 714, 422-4159. We are only one mile away from Interstate Freeway 5, take the "E" Street off-ramp in Chula Vista. We are closed on Mondays.

This list cancels all previous lists. We reserve the right to change prices without notice.

Bromeliads make wonderful house plants, easy to grow and long lasting. They can be grown outdoors in a shaded area in Southern California.

They are indigenous to Southern Mexico, Central and South America. They are decorative when not in flower. When mature, a flower spike of unusual shape and color rises from the center of the plant and may last for several months. After flowering the main plant eventually dies, but suckers are produced to replace it.

Bromeliads aren't too fussy as to what type of potting mix you use as long as it drains well. We use long-fibered brown sphagnum moss and our Bromeliads thrive well in it. The Tillandsias do best when mounted on cork, a branch of wood or on hapuu (tree fern fiber).

We keep our pots on the semi-dry side with the center of the plant filled with water during the growing season. In cooler weather we do not water as much. The Tillandsias should be sprayed about twice a week.

On the tank-type Bromeliads we root-feed once a month from March to October those that are grown outdoors. Those grown indoors can be fed year-round. Tillandsias are leaf-fed once a month. We use a 4-10-6 fish based fertilizer.

We have several other Bromeliads that are not included in this list due to the fact that we only have one or two plants of each variety. For information regarding these plants send us your want list. When requesting information please enclose stamped self-addressed envelope for prompt reply.

Bromeliad collectors are invited to join the Bromeliad Society at \$7.50 per year including the Journal. Write to: The Bromeliad Society, Inc. P. O. Box 3279, Santa Monica, California. 90403.
